RED LIGHT THERAPY PANEL

Professional Full-Body Light Therapy System

Harness the science of photobiomodulation with our professional-grade Red Light Therapy Panel. Combining 660 nm red and 850 nm near-infrared wavelengths for deep cellular healing, accelerated recovery and full-body rejuvenation — engineered for home, clinic and performance use.

WHAT'S IN THE BOX

- Built-in Handle
- Hanging Rope
- Wall Hook
- Eye Goggles
- Power Cable
- Door Hanging Kit
- Lifting Cable
- Remote Controller

SKIN REJUVENATION · MUSCLE RECOVERY · PAIN RELIEF · ANTI-AGING · BETTER SLEEP

Product Specifications

MODES RED / NIR / RED + NIR	WAVELENGTHS 630 nm, 660 nm + 810, 830, 850 nm
PRIMARY 660 nm + 850 nm	LENS ANGLE 30° Focused Output
CONTROLLER Touch Controller Panel	TIMER Yes — Built-in Timer Function
LED TYPE Dual Chip — Red + Near Infrared	HOUSING MATERIAL Alloy, Sandblasted Black

Available Models

Choose the right panel for your needs

Redlight Therapy Panel Pro Entry-level professional panel for home and clinic use.	LRP-WP-00-200
Redlight Therapy Panel Ultra Advanced full-body panel with enhanced output for performance centres.	LRP-WP-00-300

Ideal For

 Home & Apartment	 Gym & Fitness	 Hotel & Resort	 Spa & Salon	 Physiotherapy

Health **Benefits** of Red Light Therapy

Clinical-grade photobiomodulation delivers measurable outcomes across multiple physiological systems.

Skin Rejuvenation

Stimulates fibroblasts to produce collagen and elastin, visibly reducing fine lines, wrinkles and uneven skin tone. Proven in multiple peer-reviewed studies.

Muscle Recovery & Performance

Accelerates ATP synthesis in muscle cells, reduces delayed-onset muscle soreness (DOMS) and shortens recovery time after intense training.

Cellular Energy & Vitality

Near-infrared light penetrates deep into mitochondria, boosting ATP production — the cell's primary energy currency — for whole-body vitality and stamina.

Cognitive Clarity

Transcranial near-infrared stimulation has been shown to enhance focus, reduce brain fog and support neurological health and memory function.

Circulation & Cardiovascular

Promotes nitric oxide release, dilating blood vessels and improving microcirculation for better oxygen delivery and cardiovascular efficiency.

Immune & Lymphatic Support

Activates lymphatic drainage and white blood cell activity, reducing oxidative stress and strengthening the body's natural immune response.

Sleep Quality

Regulates circadian rhythm and melatonin production, leading to deeper, more restorative sleep cycles and improved overnight recovery.

Anti-Inflammatory Relief

Clinically shown to reduce pro-inflammatory cytokines, easing chronic pain, arthritis and post-injury inflammation without pharmacological intervention.
